(54) AROMATIC POLYCARBONATE RESIN COMPOSITION

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an aromatic polycarbonate resin composition having not only improved color, but also good heat stability, heat resistance, rigidity and fluidity, and in addition giving reduced environmental load.

SOLUTION: The aromatic polycarbonate resin composition comprises (A) 100 pts. wt. aromatic polycarbonate resin (component A), (B) 1-100 pts. wt. polylactic acid and/or copolymer of lactic acids with other hydroxycarboxylic acids (component B) and (C) 0.3-100 pts. wt. inorganic filler (component C) regulated so that the component proportion (B pts. wt.) of the component B and the component proportion (C pts. wt.) of the component C based on 100 pts. wt. component A may be within the range satisfying formula (I): $0.3 \times B \leq C \leq 4 \times B$.
